BashLog

Ideas • Code • Impact

COMPANY PROFILE

Web, mobile, backend and AI products

Ideas into code that creates impact

BashLog is a software agency building fast, accessible web and mobile products for ambitious teams, from first sketch to launch and beyond. We are two senior engineers who stay hands-on in every project, so you always talk to the people building your product.

What we do

- **Web development:** fast, accessible websites and web apps (Next.js, React, TypeScript).
- **Mobile apps:** Android and iOS apps from a single maintainable codebase (Flutter).
- **UI/UX design:** research-led interfaces, prototypes and design systems (Figma).
- **Backend and APIs:** secure, scalable back-ends (Python, FastAPI, Django, PostgreSQL).
- **Cloud and DevOps on AWS:** reliable hosting, automated deployments and monitoring.
- **AI and automation:** AI features and workflow automation that remove manual work.
- **Data scraping and crawlers:** dependable data collection and pipelines.
- **Custom software:** dashboards, admin tools and internal systems.
- **Support and growth:** performance, security updates and new features after launch.

How we work

- **1. Discover:** we learn your goals, users and constraints.
- **2. Design:** clear flows and interfaces you can review early.
- **3. Build:** regular demos so you see progress, not surprises.
- **4. Launch and grow:** release, monitor and keep improving.

The team

Muhammad Manan - Senior Mobile App Engineer (Flutter), 6+ years. Firebase, Supabase, REST APIs, Google Maps, FCM, sockets, UI/UX and AI.

Muhammad Ahsan - Senior Software Engineer (Python), 7+ years. AWS, Python, scraping and crawlers, FastAPI, Django, PostgreSQL and AI.

Selected work

Fleetio (desktop platform), Deens Cheese, Yiwubazaar, Reflection App, Track Fleetio, CineHub and SnapTube. Full case studies are on our website.

Technology

Flutter, Next.js, React, TypeScript, Node.js, Python (FastAPI, Django), PostgreSQL, Firebase, Supabase, AWS, Figma, Git and CI/CD. We choose the stack that fits your product.

Ways to work with us

- **Fixed-price project:** defined scope, agreed milestones and a launch date. Best for MVPs and clear requirements.
- **Dedicated team:** senior engineers working as an extension of your team on a monthly basis.
- **Hourly and support:** pay for time used, for fixes, audits, small features and post-launch care.

Next step

Tell us about your project through the contact form on our website, or book a one-to-one call with either engineer from the Team section. We reply with honest advice, a clear plan and a realistic timeline.
